

EM6400NG, next generation workhorse to meet all your energy & power monitoring needs

Benefits

EM6400NG (next generation) version of EM6400 meters are offered with fully loaded functions. Following are the customer benefits

- Detecting abnormalities -Min/Max with Date & Time stamp for 12 parameters
- 13 wiring schemes, 50/60Hz operation to meet varied applications across globe
- Monitor power quality with accurate harmonic measurement upto 15th order
- Enhanced accuracy- 64 Samples/cycle
- Fully compliance to IEC 62053-21/22, UL & CE with 3rd party lab test certificates to ensure product quality & reliability
- Easy to install slip-on clips to reduce installation time

Applications

- Suitable for any kind of Industry/ Building or Infrastructure application
- Operating range: 80 to 480V L-L AC 50/60Hz CAT III, 13 Wiring Schemes. Truly global options
