

**Smaller
is smarter**

■ IDEAS THAT CLICK

MylincTM
A little touch of genius

 **legrand[®]**
www.legrand.co.in

It's sleeker.

The Mini-CD is a smaller version of the traditional Compact Disc. Not only do Mini-CDs look sleeker in sales kits, they are also better value because of their smaller size.

Smaller isn't just smarter in CDs. Mylinc™ has been designed to be smarter than regular modular switches, in order to offer you the twin benefits of sleeker looks and value for money.

Smaller is smarter for builders.

With its stylish screwless finish and elegant rounded corners, Mylinc™ heightens the beauty of every wall in your building project. And with its competitive pricing it also offers you something to appreciate, value for money. Now you have a viable option to enhance the finishing of any housing project.

But that's not all. Mylinc™ also features child-proof sockets and has a lifetime of 27 years, which means that you can proudly inform homeowners that as a builder you not only believe in using sleeker looking switches but that you also ensure that they deliver safety & dependability.

**As the world leader in wiring accessories,
we make it our business to cater to
everyone's needs.**

It's reliable.

The memory stick is an innovative step up in conventional data storage. Not only are memory sticks more convenient for storing and carrying data, they are also far more reliable.

Smaller isn't just smarter in data storage. Mylinc™ has been designed to be smarter than regular modular switches, keeping in mind that you would prefer technically advanced products that offer convenience while improving on reliability.

Smaller is smarter for consultants.

Not only does Mylinc™ feature a smart front plate that allows itself to be easily removed, Mylinc™ switches feature a smart front removal system, meaning they can be conveniently removed from the inner plate without having to unscrew it and risk disturbing the wiring (a smart feature only found in Legrand Switches).

And as all technical data on Mylinc™ products is laser marked, meaning its inerasable, monitoring product quality & consistency is a breeze. Now you have a technically advanced option to recommend for any building project.

Moreover, Mylinc™ also features child-proof sockets and has a lifetime of 27 years, which means that as a consultant you can advise your clients to not only invest in technically advanced products but also those that offer safety & dependability.

As the world leader in wiring accessories, we make it our business to cater to everyone's needs.

It's elegant!

The mini credit card is a design innovation on the more commonly seen credit card. Not only do mini credit cards have a more elegant look, they also offer all the functions of a regular credit card.

Smaller isn't just smarter in credit cards. Mylinc™ has been designed to be smarter than regular modular switches, in order to offer you a more elegant option, without compromising on functionality.

Smaller is smarter for architects & interior designers.

With a stylish screwless finish and a beautiful curvy shape, Mylinc™ allows you to follow through with your artistic sense. With its rounded corners it even features an elegant design touch to prevent dust from accumulating in the most likely places. Now you have a classy option to enhance the aesthetic appeal of any home.

Furthermore, Mylinc™ also features child-proof sockets and has a lifetime of 27 years, which means that as an architect or designer you're not only advising your clients to opt for fashionable switches but to opt for those that add safety & dependability.

**As the world leader in wiring accessories,
we make it our business to cater to
everyone's needs.**

It's convenient!

The smaller bottle is a nice twist on the standard sized soft drink bottle. But the real beauty of its smaller size is that it makes handling it far more convenient than its bulkier cousin.

Smaller isn't just smarter in bottles. Mylinc™ has been designed to be smarter than regular modular switches, in order to offer you far more convenience when handling switches.

Smaller is smarter for contractors & electricians.

Not only does Mylinc™ feature a smart front plate that allows itself to be easily removed, Mylinc™ switches feature a smart front removal system, meaning they can be conveniently removed from the inner plate without having to unscrew it and risk disturbing the wiring (a smart feature only found in Legrand switches).

There's also a top orientation arrow to indicate the correct direction for mounting a switch. Then there's a Linc-Loc™ feature to make sure this process is foolproof. Basically, Mylinc™ ensures perfect alignment and flawless workmanship on your part. There's even a stripping template that shows you how much wire to peel off. That's a lot of convenience in one small switch.

In addition, Mylinc™ also features a compact range of products, so you'll save time over the long run and never be at a loss when it comes to finding a replacement solution.

**As the world leader in wiring accessories,
we make it our business to cater to
everyone's needs.**

It's stylish!

Mini speakers are a generation beyond regular sized speakers. Not only do they pack in more technology, they are preferred by homeowners for their smaller and more stylish design.

Smaller isn't just smarter in speakers. Mylinc™ has been designed to be smarter than regular modular switches, in order to offer you a product that appeals to both electricians and homeowners.

Smaller is smarter for retailers.

On one hand, with a Linc-Loc™ system that ensures switches are always mounted correctly, Mylinc™ appeals to electricians because it makes installation a breeze and allows them to deliver perfect workmanship.

On the other hand, with its stylish screwless finish and elegant rounded corners, Mylinc™ appeals to homeowners because it adds a higher level of finishing to their homes. Now you have one product that appeals to them both.

Best of all, Mylinc™ features a compact range of products (so you can easily decide what products to stock and keep more of them in stock) and is competitively priced (so you can stock more at a lower investment and sell more switches in a smart manner).

As the world leader in wiring accessories, we make it our business to cater to everyone's needs.

It's classy!

The mini mobile is the latest improvement in mobile phone design. Not only does it establish that smaller is sleeker, it also packs a lot more technology into a smaller place.

Smaller isn't just smarter in mobile phones. Mylinec™ has been designed to be smarter than regular modular switches, in order to offer you the luxury of style as well as the benefits of technology.

Smaller is smarter for homeowners.

With its classy screwless finish and nice curvy shape, Mylinec™ is the little beauty on your walls. And with its rounded corners it even helps keep dust from gathering in an unsightly way.

But the technology it packs is a life saver; a smart socket mechanism within Mylinec™ does not allow a plug to be inserted until both of its pins are inserted simultaneously, making it child-proof. Now you have the advantage of choosing a cuter switch that's absolutely safe at any height on your walls.

And with an ISI mark of quality it goes without saying that you are choosing a product of the highest quality.

As the world leader in wiring accessories, we make it our business to cater to everyone's needs.

Smaller is smarter in design.

Mylinc™ is a complete range of modular wiring accessories.

Switches and sockets designed and made in India, keeping everyone's requirements in mind. Whether it's safety, reliability, convenience or beauty; smaller is smarter in modular switch design.

Screwless finish & rounded corners

With smooth curves, a sleek shape and a screwless appearance, Mylinc™ adds beauty to any home in style.

Laser marking

All technical data on the product is laser marked, making it inerasable. This facilitates the monitoring of product quality.

Linc-Loc™

Mylinc™ is intelligent enough to ensure that no one can fix it upside down even by accident. Moreover, all the switches and sockets get perfectly aligned by getting linked to one another.

Top orientation arrow

This feature indicates the correct direction for mounting a switch and facilitates installation.

Childproof sockets

A smart socket mechanism within Mylinc™ does not allow a plug to be inserted until both of its pins are inserted simultaneously. Hence there is no possibility of a child receiving a shock by accidentally attempting to insert a metal object into the socket.

Front Removal

This feature allows for the replacement of switches without having to open the plate and risk disturbing the wiring.

Stripping Template

This feature indicates how much wire to peel off.

ISI marking

This mark of quality ensures product reliability for the Indian market.

1 lac operations

With a guarantee of 100,000 operations, assuming an average switch is operated 10 times a day, this product is dependable for 27 years.

CE marking

This mark of quality further signifies that this product has been certified for export to the European market.

Modular plates (Details on p. 18-22)

Superior finish, screwless, rounded corners dust proof, solid strength.
Supported by plastic frame behind with flexible wall alignment.
Horizontal adjustment facility.

Smaller is smarter to install

Install Mylinc™ in 5 easy steps on a metal flush box

Mylinc™ installation
on the metal flush box.

Click the switch mechanism on the frame,
with the top arrow indicating the right direction.

Install the switch frame
assembly into the
flush mounting box.

Finally, clip-on the
aesthetically elegant plate
for screwless appearance.

Ready to use the
beautiful Mylinc™ Switch.

Smaller is smarter in colours

Mylinc™ is also smarter when it comes to plates. Not only are they strong, dust-proof and screwless they have rounded corners and superior finishing. Supported by a plastic frame they offer flexible wall alignment and are easy to adjust horizontally. It has an articulate answers to blend beautifully with any decor. Even better, they come in 4 attractive colours: pearl, wood, grey & bronze.
