

The offerings under this range include products for efficient generation and distribution of power. Product brands under this segment consist of DMX<sup>3</sup>, DRX and DPX<sup>3</sup>. Following is the product listing provided:

These new ACBs offer efficient protection and control for all types of buildings. The range covers 11 rated currents, between 630A to 6300A

DMX<sup>3</sup> Air  
Circuit Breakers

DPX<sup>3</sup> & DPX MCCBs

The new range of Moulded Case Circuit Breakers from 16A to 1600A provides improved protection and control for all your low voltage installations.

A universal solution for residential & commercial; Legrand's DRX range integrates perfectly within standard electrical installations anywhere in the world. With the DRX 100, u have the choice of 3 ratings from 60 A to 100 A in 10kA breaking capacity.

DRX MCCBs

Automatic Transfer Switch

In applications where even the slightest delay in supply could result in low losses, the DPX3 range of MCCBs can be efficiently used as an Automatic Transfer Switch for power switching. When connected with the microprocessor control box (line changeover unit) it gives you the flexibility to manage that automatic changeover between two supply lines effectively with remote controls.

XL<sup>3</sup> Power Distribution Enclosures

➡ The new XL3 range offers enclosures upto 6300 A.

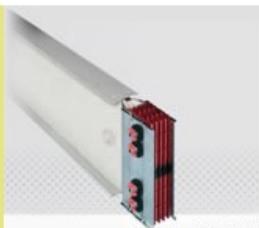

ZUCCHINI  
BUSBAR TRUNKING SYSTEM  
Low Power Busbar

A busbar is the ideal solution for every type of connection and gives you different advantages compared to a traditional cable installation. LB plus is the new range of Zucchini busbars for the distribution of power from 25 to 63 A. It is available in aluminium and copper that is simpler, better performing and easier to install.  
Low power busbar: LB PLUS – 25- 63A

A busbar is the ideal solution for every type of connection and gives you different advantages compared to a traditional cable installation. Zucchini medium power busbars are available in sizes ranging from 63 A to 1000 A with air insulated aluminium and copper conductors.

Medium power busbar: MS- 63 – 160A, MR – 160 – 1000A, TS- 63- 250A

ZUCCHINI  
BUSBAR TRUNKING SYSTEM  
Medium Power Busbar

ZUCCHINI  
BUSBAR TRUNKING SYSTEM  
High Power Busbar

A busbar is the ideal solution for every type of connection and gives you different advantages compared to a traditional cable installation. Zucchini sandwich busbar trunking provides a safe and reliable solution for high power distribution (up to 5000 A) in copper and aluminium. This solution is easy to install and reduces heat dissipation.

- High power busbar: SCP – 630 – 5000A

Legrand's range of solutions for reactive energy compensation, giving you the power to contribute to energy savings and reduce environmental impact.
